

CURRIE COMMUNITY CENTRE

Information for people with disabilities

We are working towards being a fully accessible community building, but recognise we still have some way to go.

We have an accessible toilet/changing room and shower and a ramp at our front door. On our wish list is also a power assisted opener for the front door.

We are a single storey building with no internal steps, except those up to the stage. The fire exit at the back door has no steps down from it. Guide dogs and assistance dogs are welcome when accompanying their owners.

If you come across any aspect of the building which causes difficulties for you or for a disabled person you are accompanying, please do let a member of the committee know about it, or send an email to the address below. That way we know what things have to be prioritised.
